Journal of Alloys and Compounds 310 (2000) 465–471

Journal of ALLOYS AND COMPOUNDS

www.elsevier.com/locate/jallcom

Subject Index of Volume 310

Acoustic emission
effectiveness of new spectral tools in the anomaly detection of rolling element bearings 276
Acoustic properties
relaxational lattice dynamics in $La_{2-x}Sr_xCuO_4$ and possible connection with the stripes in cuprate superconductors 16
non-linear anelasticity due to dislocation–solute atom interactions in solid solutions 85
internal friction and Young's modulus of V–Ti–Cr alloy before, during and after proton irradiation 102
theory of dislocation tunneling through a pinning point 111
vibrating ferromagnets in a magnetic field 144
amplitude dependent damping in HgI_2 wide band gap semiconductor 153
magneto-mechanical damping and ΔE-effect in ferritic steel at different levels of ultrasound strain amplitudes 169
nonlinear electromechanical behaviour of KDP near its phase transition 181
resonant ultrasound spectroscopy: applications, current status and limitations 243
internal friction and elastic properties of the high pressure-induced phases of solid C_{60} 292
towards understanding anelasticity of the β_1' martensitic phase of Cu–Al–Ni 306
structural anelasticity of NiTi during two-stage martensitic transformation 312
elastic and anelastic properties of Marval 18 steel 400
Acoustical properties
influence of the interaction between dislocations and mobile point-defects on the damping spectrum of aluminium 62
Activation energy
experimental study of the nonlinear internal friction peaks in Al–Mg solid solutions 72
Active damping
an approach to higher damping capacity based on a control theory strategy 261
Actuator
an approach to higher damping capacity based on a control theory strategy 261
Ageing
influence of ageing on the internal friction of magnesium 127
Aging(D)
effect of dislocation density on the low temperature aging behavior of an ultra low carbon bake hardening steel 405
Airborne chemicals
a chemical sensor based on internal friction 251
Al–Mg alloy
experimental study of the nonlinear internal friction peaks in Al–Mg solid solutions 72
theory of the nonlinear internal friction associated with bulk diffusion of solute atoms around dislocations in Al–Mg alloys 76
Aluminium alloy
low frequency relaxation effect observed on 2024 aluminium alloy 173
Amorphous materials
relaxation mechanisms and microstructure in glass and glass-ceramics 32
internal friction of the glassy tektites 54
resonant ultrasound spectroscopy: applications, current status and limitations 243
dynamics in polymer–liquid crystal microcomposites studied by low frequency mechanical spectroscopy 363
shear viscosity of inorganic glasses and polymers 378
Anelastic relaxation
local structure of metallic glasses as seen by mechanical hydrogen relaxation 224
Anelasticity
mechanical spectroscopy of the high-temperature brittle-to-ductile transition in ceramics and cermets 7
low temperature relaxations associated with quantum tunnelling of H in Sc and Y 196
analysis of the internal friction spectra during martensitic transformation by a new temperature rate method 334
Anharmonicity
relaxational lattice dynamics in $La_{2-x}Sr_xCuO_4$ and possible connection with the stripes in cuprate superconductors 16

Barkhausen noise
application of the wavelet transform in mechanical spectroscopy and in Barkhausen noise analysis 269
Bearing
effectiveness of new spectral tools in the anomaly detection of rolling element bearings 276
Betaines
ultrasonic investigation of elastic phase transitions in betaine compounds 176
Bulk diffusion
theory of the nonlinear internal friction associated with bulk diffusion of solute atoms around dislocations in Al–Mg alloys 76

Cantilever beam
an approach to higher damping capacity based on a control theory strategy 261
C–Cr_n clusters
h-induced C–Cr cluster redistribution in MANET steel 209
Ceramics
mechanical spectroscopy of the high-temperature brittle-to-ductile transition in ceramics and cermets 7
the innovative impulse excitation technique for high-temperature mechanical spectroscopy 284

Elsevier Science S.A.
PII: S0925-8388(00)01165-8

Chemical sensor
a chemical sensor based on internal friction 251
Chemical synthesis
magnetic held dependence of elastic modulus and resistance in $La_{2/3}Ca_{1/3}MnO_3$ 44
Composite materials
measurement of the elastic modulus of dental pieces 392
Computer simulation
computer experiment on propagation of solitons in crystals 97
Control theory
an approach to higher damping capacity based on a control theory strategy 261
Creep
internal friction of γ-TiAl alloys at high temperature 134
Cr martensitic steel
h-induced C–Cr cluster redistribution in MANET steel 209
Cryogenic temperatures
high precision measurement of torsion fiber internal friction at cryogenic temperatures 233
Crystal growth
relaxation mechanisms and microstructure in glass and glass-ceramics 32
Crystal structure
relaxation mechanisms and microstructure in glass and glass-ceramics 32
Cubic zirconia
mechanical loss of cubic zirconia 47
Cu–CuAlO alloys
internal friction of Cu–CuAlO alloys 131
CuZnAl single crystal
elastic constant softening and martensite nucleation in a CuZnAl single crystal 318

Damping
damping of water infiltrated nanoporous glass 24
influence of ageing on the internal friction of magnesium 127
Deuterated betaine phosphite
ultrasonic investigation of elastic phase transitions in betaine compounds 176
Dielectric response
relaxation mechanisms and microstructure in glass and glass-ceramics 32
dielectric properties of polymer-based microheterogeneous insulator 368
Dislocation
influence of ageing on the internal friction of magnesium 127
Dislocation(C)
effect of dislocation density on the low temperature aging behavior of an ultra low carbon bake hardening steel 405
Dislocation core structure
core structure and mobility of an edge dislocation in aluminum 80
Dislocation damping
internal friction in microcrystalline magnesium reinforced by alumina particles 396
dislocation damping after plastic deformation in interstitial-free and carbon steels 423
Dislocation-defect interactions
dislocation-defect interactions in nuclear reactor pressure-vessel steels investigated by means of internal friction 445
Dislocations
influence of the interaction between dislocations and mobile point-defects on the damping spectrum of aluminium 62
influence of plastic deformation on the velocity and ultrasonic attenuation of copper single crystals 68
non-linear anelasticity due to dislocation–solute atom interactions in solid solutions 85
internal friction and Young's modulus of V–Ti–Cr alloy before, during and after proton irradiation 102
comparison between the ultrasonic and the low frequency Bordoni peaks in copper 115
dislocation contribution to modulus defect in nanocrystalline pure metals 124
amplitude dependent damping in HgI_2 wide band gap semiconductor 153
grain boundary relaxation of hydrogen precharged mild and Cr steels 205
towards understanding anelasticity of the β_1' martensitic phase of Cu–Al–Ni 306
structural anelasticity of NiTi during two-stage martensitic transformation 312
Dislocations and disclinations
determination of the pre-exponential factor and the activation energy for the low-temperature dislocation relaxation in aluminum 107
theory of dislocation tunneling through a pinning point 111
Snoek relaxation in a copper-precipitated alloy steel 432
in-situ monitoring of ultrasonic attenuation during rotating bending fatigue of carbon steel with electromagnetic acoustic resonance 436
Disordered system
mechanical spectroscopy and structural evolution of CuMo thin films 454
Dissolution
internal friction study of environmental effects on metals and alloys 256
Dynamic mechanical properties
dynamical properties of epoxy composites filled with quartz powder 374

ΔE effect
magnetomechanical damping in Fe–Cr alloys and effect of Al and Mo addition 160
Elastic anomalies
ultrasonic investigation of elastic phase transitions in betaine compounds 176
Elastic constants
elastic constant softening and martensite nucleation in a CuZnAl single crystal 318
Elastic energy loss
anelastic relaxation in semi-insulating InP 288
Elastic modulus
precipitation and dissolution peaks of hydride in Zr–2.5Nb during quasistatic thermal cycles 214
Elasticity
magnetic held dependence of elastic modulus and resistance in $La_{2/3}Ca_{1/3}MnO_3$ 44
dislocation contribution to modulus defect in nanocrystalline pure metals 124
nonlinear electromechanical behaviour of KDP near its phase transition 181
internal friction and elastic properties of the high pressure-induced phases of solid C_{60} 292
towards understanding anelasticity of the β_1' martensitic phase of Cu–Al–Ni 306
influence of high-energy impact actions on the elastic and anelastic properties of martensitic Cu–Al–Ni crystals 324
upward modulus trend in NiAl and NiFeAl single crystals 351
measurement of the elastic modulus of dental pieces 392
elastic and anelastic properties of Marval 18 steel 400
Snoek relaxation in a copper-precipitated alloy steel 432
Electrochemical oxidation
internal friction study of environmental effects on metals and alloys 256
Electron–phonon interaction
relaxational lattice dynamics in $La_{2-x}Sr_xCuO_4$ and possible connection with the stripes in cuprate superconductors 16

EMAR
ultrasonic attenuation monitoring of fatigue damage in low carbon steels with electromagnetic acoustic resonance (EMAR) 440
Environmentally assisted cracking
internal friction study of environmental effects on metals and alloys 256

Fatigue
in-situ monitoring of ultrasonic attenuation during rotating bending fatigue of carbon steel with electromagnetic acoustic resonance 436
Fatigue damage
ultrasonic attenuation monitoring of fatigue damage in low carbon steels with electromagnetic acoustic resonance (EMAR) 440
Ferritic steels
magneto-mechanical damping and ΔE-effect in ferritic steel at different levels of ultrasound strain amplitudes 169
Ferroelectrics
ultrasound studies of phase transitions in tungsten bronze ferroelectric materials 29
nonlinear electromechanical behaviour of KDP near its phase transition 181
Filled epoxy resin
dynamical properties of epoxy composites filled with quartz powder 374
Finkelshtain–Rosin peak
the Finkelshtain–Rosin effect in deformed f.c.c. steels 418
Forced oscillations
internal friction and loss tangent of nonlinear viscoelastic materials: different concepts, different results 280
Fullerenes
internal friction and elastic properties of the high pressure-induced phases of solid C_{60} 292

Glass–rubber phase transformation
glass–rubber phase transformation detected in polymers by means of ultrasonic waves 382
Glass transition
silicon nitrides studied by isothermal mechanical spectroscopy 36
fatigue resistant silicon nitride ceramics due to anelastic deformation and energy dissipation 39
the innovative impulse excitation technique for high-temperature mechanical spectroscopy 284
shear viscosity of inorganic glasses and polymers 378
glass transition temperature measured at high frequencies by piezoelectric excitation 388
Grain boundaries
mechanical spectroscopy of the high-temperature brittle-to-ductile transition in ceramics and cermets 7
grain boundary relaxation of hydrogen precharged mild and Cr steels 205
anelastic properties of aluminium thin films on silicon cantilevers 449
Grain boundary
fatigue resistant silicon nitride ceramics due to anelastic deformation and energy dissipation 39
the innovative impulse excitation technique for high-temperature mechanical spectroscopy 284

Heat treatment
influence of ageing on the internal friction of magnesium 127
High temperature fatigue
fatigue resistant silicon nitride ceramics due to anelastic deformation and energy dissipation 39
High-T_c superconductors
relaxational lattice dynamics in $La_{2-x}Sr_xCuO_4$ and possible connection with the stripes in cuprate superconductors 16

H tunnelling
low temperature relaxations associated with quantum tunnelling of H in Sc and Y 196
Hydride delayed crack
precipitation and dissolution peaks of hydride in Zr–2.5Nb during quasistatic thermal cycles 214
Hydrides
hydrogen diffusion in titanium and zirconium hydrides 190
Hydrogen
hydrogen-probe mechanical spectroscopy for studying local ordering in concentrated substitutional alloy 200
types of mechanical relaxation by hydrogen in intermetallic compounds 219
Hydrogen as a probe
local structure of metallic glasses as seen by mechanical hydrogen relaxation 224
Hydrogen diffusion
hydrogen diffusion in titanium and zirconium hydrides 190
Hydrogen permeation
h-induced C–Cr cluster redistribution in MANET steel 209
Hydrogen-related defects
anelastic relaxation in semi-insulating InP 288
Hydrogen solubility
precipitation and dissolution peaks of hydride in Zr–2.5Nb during quasistatic thermal cycles 214

In–Sn alloys
temperature dependence of the viscoelastic response of In, Sn and In–Sn alloys 91
Insulators
dielectric properties of polymer-based microheterogeneous insulator 368
Interatomic interaction
the Finkelshtain–Rosin effect in deformed f.c.c. steels 418
Intercrystalline Gorsky effect
types of mechanical relaxation by hydrogen in intermetallic compounds 219
Intermetallic compounds
types of mechanical relaxation by hydrogen in intermetallic compounds 219
Intermetallics
internal friction of γ-TiAl alloys at high temperature 134
structural anelasticity of NiTi during two-stage martensitic transformation 312
upward modulus trend in NiAl and NiFeAl single crystals 351
Internal friction
fatigue resistant silicon nitride ceramics due to anelastic deformation and energy dissipation 39
internal friction of the glassy tektites 54
internal friction of Cu–CuAlO alloys 131
internal friction of γ-TiAl alloys at high temperature 134
low frequency relaxation effect observed on 2024 aluminium alloy 173
hydrogen-probe mechanical spectroscopy for studying local ordering in concentrated substitutional alloy 200
h-induced C–Cr cluster redistribution in MANET steel 209
precipitation and dissolution peaks of hydride in Zr–2.5Nb during quasistatic thermal cycles 214
a chemical sensor based on internal friction 251
internal friction study of environmental effects on metals and alloys 256
the innovative impulse excitation technique for high-temperature mechanical spectroscopy 284
internal friction and elastic properties of the high pressure-induced phases of solid C_{60} 292
effect of thermal cycling through the martensitic transition on the internal friction and Young's modulus of a $Ni_{50.8}Ti_{49.2}$ alloy 300

Cu–13.2Al–3Ni (wt%) single crystal studied by isothermal mechanical spectroscopy 330
analysis of the internal friction spectra during martensitic transformation by a new temperature rate method 334
internal friction of Ti–Ni alloys 339
anelastic relaxation due to interstitial solute atoms in face-centred cubic metals 344
the Finkelshtain–Rosin effect in deformed f.c.c. steels 418
dislocation damping after plastic deformation in interstitial-free and carbon steels 423
dislocation-defect interactions in nuclear reactor pressure-vessel steels investigated by means of internal friction 445
Internal friction(E)
effect of dislocation density on the low temperature aging behavior of an ultra low carbon bake hardening steel 405
Interstitial alloys
non-linear anelasticity due to dislocation–solute atom interactions in solid solutions 85
interstitial distribution in Fe–Al and Fe–Cr quenched and aged alloys: Computer simulation and internal friction study 356
anelastic effects connected with isothermal martensitic transformations in 24Ni4Mo austenitic and 12Cr9Ni4Mo maraging steels 411
Interstitial solutes
anelastic relaxation due to interstitial solute atoms in face-centred cubic metals 344
Invar-type alloys
hydrogen-probe mechanical spectroscopy for studying local ordering in concentrated substitutional alloy 200

Laser–ultrasound
laser–ultrasonic absorption measurements in low carbon steels 427
LB film
computer experiment on propagation of solitons in crystals 97
Liquid crystals
dynamics in polymer–liquid crystal microcomposites studied by low frequency mechanical spectroscopy 363
Low carbon steel
laser–ultrasonic absorption measurements in low carbon steels 427
Low carbon steels
ultrasonic attenuation monitoring of fatigue damage in low carbon steels with electromagnetic acoustic resonance (EMAR) 440
Luminescence
amplitude dependent damping in HgI_2 wide band gap semiconductor 153

Magnesium
influence of ageing on the internal friction of magnesium 127
Magnetically ordered materials
magnetic held dependence of elastic modulus and resistance in $La_{2/3}Ca_{1/3}MnO_3$ 44
Magnetic materials
vibrating ferromagnets in a magnetic field 144
Magnetic measurements
vibrating ferromagnets in a magnetic field 144
Magnetomechanical damping
magnetomechanical damping in Fe–Cr alloys and effect of Al and Mo addition 160
Magneto-mechanical damping
magneto-mechanical damping and ΔE-effect in ferritic steel at different levels of ultrasound strain amplitudes 169
Magnetostriction
magnetic held dependence of elastic modulus and resistance in $La_{2/3}Ca_{1/3}MnO_3$ 44
vibrating ferromagnets in a magnetic field 144
microeddy current damping 165
Magnetostriction constant
magnetomechanical damping in Fe–Cr alloys and effect of Al and Mo addition 160
Martensite
Cu–13.2Al–3Ni (wt%) single crystal studied by isothermal mechanical spectroscopy 330
Martensitic phase
towards understanding anelasticity of the β_1' martensitic phase of Cu–Al–Ni 306
Martensitic transformation
the innovative impulse excitation technique for high-temperature mechanical spectroscopy 284
internal friction of Ti–Ni alloys 339
Martensitic transformations
analysis of the internal friction spectra during martensitic transformation by a new temperature rate method 334
Martensitic transition
effect of thermal cycling through the martensitic transition on the internal friction and Young's modulus of a $Ni_{50.8}Ti_{49.2}$ alloy 300
Martensitic transitions
elastic constant softening and martensite nucleation in a CuZnAl single crystal 318
Material damping
an approach to higher damping capacity based on a control theory strategy 261
Mechanical alloying
internal friction in microcrystalline magnesium reinforced by alumina particles 396
Mechanical loss
mechanical loss of cubic zirconia 47
Mechanical properties
relaxation mechanisms and microstructure in glass and glass-ceramics 32
fatigue resistant silicon nitride ceramics due to anelastic deformation and energy dissipation 39
internal friction of the glassy tektites 54
temperature dependence of the viscoelastic response of In, Sn and In–Sn alloys 91
determination of the pre-exponential factor and the activation energy for the low-temperature dislocation relaxation in aluminum 107
theory of dislocation tunneling through a pinning point 111
internal friction of γ-TiAl alloys at high temperature 134
microeddy current damping 165
sphere on a vibrating reed for measurements of turbulence in superfluid helium 265
influence of high-energy impact actions on the elastic and anelastic properties of martensitic Cu–Al–Ni crystals 324
anelastic relaxation due to interstitial solute atoms in face-centred cubic metals 344
upward modulus trend in NiAl and NiFeAl single crystals 351
dynamics in polymer–liquid crystal microcomposites studied by low frequency mechanical spectroscopy 363
dielectric properties of polymer-based microheterogeneous insulator 368
dislocation-defect interactions in nuclear reactor pressure-vessel steels investigated by means of internal friction 445
anelastic properties of aluminium thin films on silicon cantilevers 449
mechanical spectroscopy and structural evolution of CuMo thin films 454
Mechanical spectroscopy
mechanical spectroscopy of the high-temperature brittle-to-ductile transition in ceramics and cermets 7
local structure of metallic glasses as seen by mechanical hydrogen relaxation 224
a mechanical spectroscopy study of the $Zr_{69.5}Cu_{12}Ni_{11}Al_{7.5}$ alloy 229
application of the wavelet transform in mechanical spectroscopy and in Barkhausen noise analysis 269

the innovative impulse excitation technique for high-temperature mechanical spectroscopy 284

Metal
influence of high-energy impact actions on the elastic and anelastic properties of martensitic Cu–Al–Ni crystals 324

Metallic glasses
local structure of metallic glasses as seen by mechanical hydrogen relaxation 224
a mechanical spectroscopy study of the $Zr_{69.5}Cu_{12}Ni_{11}Al_{7.5}$ alloy 229

Metals
influence of the interaction between dislocations and mobile point-defects on the damping spectrum of aluminium 62
influence of plastic deformation on the velocity and ultrasonic attenuation of copper single crystals 68
non-linear anelasticity due to dislocation–solute atom interactions in solid solutions 85
determination of the pre-exponential factor and the activation energy for the low-temperature dislocation relaxation in aluminum 107
theory of dislocation tunneling through a pinning point 111
comparison between the ultrasonic and the low frequency Bordoni peaks in copper 115
microeddy current damping 165
anelastic relaxation due to interstitial solute atoms in face-centred cubic metals 344
elastic and anelastic properties of Marval 18 steel 400
dislocation damping after plastic deformation in interstitial-free and carbon steels 423
Snoek relaxation in a copper-precipitated alloy steel 432
in-situ monitoring of ultrasonic attenuation during rotating bending fatigue of carbon steel with electromagnetic acoustic resonance 436
dislocation-defect interactions in nuclear reactor pressure-vessel steels investigated by means of internal friction 445
anelastic properties of aluminium thin films on silicon cantilevers 449

Mg base composites
internal friction in microcrystalline magnesium reinforced by alumina particles 396

Molecular dynamics
computer experiment on propagation of solitons in crystals 97

Molecular dynamics simulation
core structure and mobility of an edge dislocation in aluminum 80

Nanoporous glass
damping of water infiltrated nanoporous glass 24

Nanostructures
dislocation contribution to modulus defect in nanocrystalline pure metals 124
anelastic properties of aluminium thin films on silicon cantilevers 449

NiTi alloy
effect of thermal cycling through the martensitic transition on the internal friction and Young's modulus of a $Ni_{50.8}Ti_{49.2}$ alloy 300

Noise
effectiveness of new spectral tools in the anomaly detection of rolling element bearings 276

Nonlinear internal friction
experimental study of the nonlinear internal friction peaks in Al–Mg solid solutions 72
theory of the nonlinear internal friction associated with bulk diffusion of solute atoms around dislocations in Al–Mg alloys 76

Nonlinear viscoelasticity
internal friction and loss tangent of nonlinear viscoelastic materials: different concepts, different results 280

One-dimensional crystal
computer experiment on propagation of solitons in crystals 97

Order–disorder effects
hydrogen-probe mechanical spectroscopy for studying local ordering in concentrated substitutional alloy 200
interstitial distribution in Fe–Al and Fe–Cr quenched and aged alloys: Computer simulation and internal friction study 356

Organic crystals
measurement of the elastic modulus of dental pieces 392

Peierls stress
core structure and mobility of an edge dislocation in aluminum 80

Phase transformation
precipitation and dissolution peaks of hydride in Zr–2.5Nb during quasistatic thermal cycles 214

Phase transitions
ultrasound studies of phase transitions in tungsten bronze ferroelectric materials 29
nonlinear electromechanical behaviour of KDP near its phase transition 181
sphere on a vibrating reed for measurements of turbulence in superfluid helium 265
structural anelasticity of NiTi during two-stage martensitic transformation 312
Cu–13.2Al–3Ni (wt%) single crystal studied by isothermal mechanical spectroscopy 330
dynamics in polymer–liquid crystal microcomposites studied by low frequency mechanical spectroscopy 363

Phase transitions and elasticity
anelastic effects connected with isothermal martensitic transformations in 24Ni4Mo austenitic and 12Cr9Ni4Mo maraging steels 411

Plastic deformation
dislocation damping after plastic deformation in interstitial-free and carbon steels 423

Point defects
internal friction of the glassy tektites 54
influence of the interaction between dislocations and mobile point-defects on the damping spectrum of aluminium 62
non-linear anelasticity due to dislocation–solute atom interactions in solid solutions 85
internal friction and Young's modulus of V–Ti–Cr alloy before, during and after proton irradiation 102
amplitude dependent damping in HgI_2 wide band gap semiconductor 153
low temperature relaxations associated with quantum tunnelling of H in Sc and Y 196
anelastic relaxation due to interstitial solute atoms in face-centred cubic metals 344
interstitial distribution in Fe–Al and Fe–Cr quenched and aged alloys: Computer simulation and internal friction study 356
dislocation damping after plastic deformation in interstitial-free and carbon steels 423
Snoek relaxation in a copper-precipitated alloy steel 432

Polymers
internal friction and loss tangent of nonlinear viscoelastic materials: different concepts, different results 280
dynamics in polymer–liquid crystal microcomposites studied by low frequency mechanical spectroscopy 363
dielectric properties of polymer-based microheterogeneous insulator 368
glass–rubber phase transformation detected in polymers by means of ultrasonic waves 382
glass transition temperature measured at high frequencies by piezoelectric excitation 388

Powder metallurgy
mechanical spectroscopy of the high-temperature brittle-to-ductile transition in ceramics and cermets 7

Precipitation
elastic and anelastic properties of Marval 18 steel 400
Precipitation hardening
low frequency relaxation effect observed on 2024 aluminium alloy 173
Precision measurement
high precision measurement of torsion fiber internal friction at cryogenic temperatures 233

Quasicrystals
mechanical spectroscopy of quasicrystals 184
a mechanical spectroscopy study of the $Zr_{69.5}Cu_{12}Ni_{11}Al_{7.5}$ alloy 229

Radiation effects
dislocation-defect interactions in nuclear reactor pressure-vessel steels investigated by means of internal friction 445
Relaxation peak
anelastic relaxation in semi-insulating InP 288
Resonance method
in-situ monitoring of ultrasonic attenuation during rotating bending fatigue of carbon steel with electromagnetic acoustic resonance 436
Resonant peak
magnetomechanical damping in Fe–Cr alloys and effect of Al and Mo addition 160

Scanning microscopy
magnetic held dependence of elastic modulus and resistance in $La_{2/3}Ca_{1/3}MnO_3$ 44
Semiconductors
amplitude dependent damping in HgI_2 wide band gap semiconductor 153
Sensor
an approach to higher damping capacity based on a control theory strategy 261
Shape memory alloy
Cu–13.2Al–3Ni (wt%) single crystal studied by isothermal mechanical spectroscopy 330
internal friction of Ti–Ni alloys 339
Shape memory alloys
analysis of the internal friction spectra during martensitic transformation by a new temperature rate method 334
Short-range order
local structure of metallic glasses as seen by mechanical hydrogen relaxation 224
Silicon nitride
silicon nitrides studied by isothermal mechanical spectroscopy 36
Silicon nitride ceramic
fatigue resistant silicon nitride ceramics due to anelastic deformation and energy dissipation 39
Solitons and phonons
computer experiment on propagation of solitons in crystals 97
Spin glasses
vibrating ferromagnets in a magnetic field 144
Steel
dislocation damping after plastic deformation in interstitial-free and carbon steels 423
Substitutional alloys
internal friction and Young's modulus of V–Ti–Cr alloy before, during and after proton irradiation 102
Surfaces and interfaces
dielectric properties of polymer-based microheterogeneous insulator 368

Tektites
internal friction of the glassy tektites 54
Thermal analysis
dynamics in polymer–liquid crystal microcomposites studied by low frequency mechanical spectroscopy 363
Thermal cycling
effect of thermal cycling through the martensitic transition on the internal friction and Young's modulus of a $Ni_{50.8}Ti_{49.2}$ alloy 300
Thermal stresses
internal friction in microcrystalline magnesium reinforced by alumina particles 396
Thermoelectric power
internal friction of Ti–Ni alloys 339
Thin films
anelastic properties of aluminium thin films on silicon cantilevers 449
mechanical spectroscopy and structural evolution of CuMo thin films 454
TiNi
internal friction of Ti–Ni alloys 339
Titanium
hydrogen diffusion in titanium and zirconium hydrides 190
Torsion fiber friction
high precision measurement of torsion fiber internal friction at cryogenic temperatures 233
Tunneling
theory of dislocation tunneling through a pinning point 111

ULC-steel(A)
effect of dislocation density on the low temperature aging behavior of an ultra low carbon bake hardening steel 405
Ultrasonic
ultrasound studies of phase transitions in tungsten bronze ferroelectric materials 29
Ultrasonic absorption
laser–ultrasonic absorption measurements in low carbon steels 427
Ultrasonic attenuation
ultrasonic attenuation monitoring of fatigue damage in low carbon steels with electromagnetic acoustic resonance (EMAR) 440
Ultrasonic waves
glass–rubber phase transformation detected in polymers by means of ultrasonic waves 382
Ultrasonics
influence of the interaction between dislocations and mobile point-defects on the damping spectrum of aluminium 62
influence of plastic deformation on the velocity and ultrasonic attenuation of copper single crystals 68
temperature dependence of the viscoelastic response of In, Sn and In–Sn alloys 91
internal friction and Young's modulus of V–Ti–Cr alloy before, during and after proton irradiation 102
determination of the pre-exponential factor and the activation energy for the low-temperature dislocation relaxation in aluminum 107
comparison between the ultrasonic and the low frequency Bordoni peaks in copper 115
amplitude dependent damping in HgI_2 wide band gap semiconductor 153
microeddy current damping 165
magneto-mechanical damping and ΔE-effect in ferritic steel at different levels of ultrasound strain amplitudes 169
nonlinear electromechanical behaviour of KDP near its phase transition 181
resonant ultrasound spectroscopy: applications, current status and limitations 243
towards understanding anelasticity of the β_1' martensitic phase of Cu–Al–Ni 306
structural anelasticity of NiTi during two-stage martensitic transformation 312

influence of high-energy impact actions on the elastic and anelastic properties of martensitic Cu–Al–Ni crystals 324
glass transition temperature measured at high frequencies by piezoelectric excitation 388
measurement of the elastic modulus of dental pieces 392
dislocation damping after plastic deformation in interstitial-free and carbon steels 423
in-situ monitoring of ultrasonic attenuation during rotating bending fatigue of carbon steel with electromagnetic acoustic resonance 436
Ultrasonics attenuation
elastic constant softening and martensite nucleation in a CuZnAl single crystal 318
Ultrasonics(E)
effect of dislocation density on the low temperature aging behavior of an ultra low carbon bake hardening steel 405

Vapor deposition
dislocation contribution to modulus defect in nanocrystalline pure metals 124
Vibration
effectiveness of new spectral tools in the anomaly detection of rolling element bearings 276
Viscoelasticity
silicon nitrides studied by isothermal mechanical spectroscopy 36
glass transition temperature measured at high frequencies by piezoelectric excitation 388
Viscosity
shear viscosity of inorganic glasses and polymers 378

Water infiltration
damping of water infiltrated nanoporous glass 24
Wavelet
effectiveness of new spectral tools in the anomaly detection of rolling element bearings 276
Wavelet transform
application of the wavelet transform in mechanical spectroscopy and in Barkhausen noise analysis 269

X-ray diffraction
relaxation mechanisms and microstructure in glass and glass-ceramics 32
mechanical spectroscopy and structural evolution of CuMo thin films 454

Yield phenomena(D)
effect of dislocation density on the low temperature aging behavior of an ultra low carbon bake hardening steel 405
Young's modulus
effect of thermal cycling through the martensitic transition on the internal friction and Young's modulus of a $Ni_{50.8}Ti_{49.2}$ alloy 300

Zener-type relaxation
types of mechanical relaxation by hydrogen in intermetallic compounds 219
Zirconium
hydrogen diffusion in titanium and zirconium hydrides 190
Zr alloys
precipitation and dissolution peaks of hydride in Zr–2.5Nb during quasistatic thermal cycles 214
